

# Syllabus of Java Course in Bangalore

Core Java Syllabus (Total Duration-35hrs)

Module 1: Introduction (Duration-0.5hr)

• Platform Independency

• Java Technology (JDK, JRE, JVM, JIT)

• Java Why? What? How? When? Where?
• Different Java Versions.
• How Java is different from other Technologies
Module 2: Introduction To Java Programming Environment (Duration-1hr)
• How to Install & set Path.
• A Simple Java Program
Compiling & executing Java Program
• Phases of Java Program
Analysis of a Java Program
• Understanding Syntax and Semantic Error,
• Runtime Exception
Name of a Java Source File

Module 3: Fundamentals of Java Programming (Duration-1hr)
Naming convention of Java language
• Comments
• Statements
• Blocks (Static, Non-static/instance)
• Identifiers
• Keywords
• Literals
• Primitive Data Types, Range
• Reference (User defined) Data type
• Variables (Primitive, Reference)
• Type Casting, Default Value
• Operators
Program/Interview questions

• Features of Java

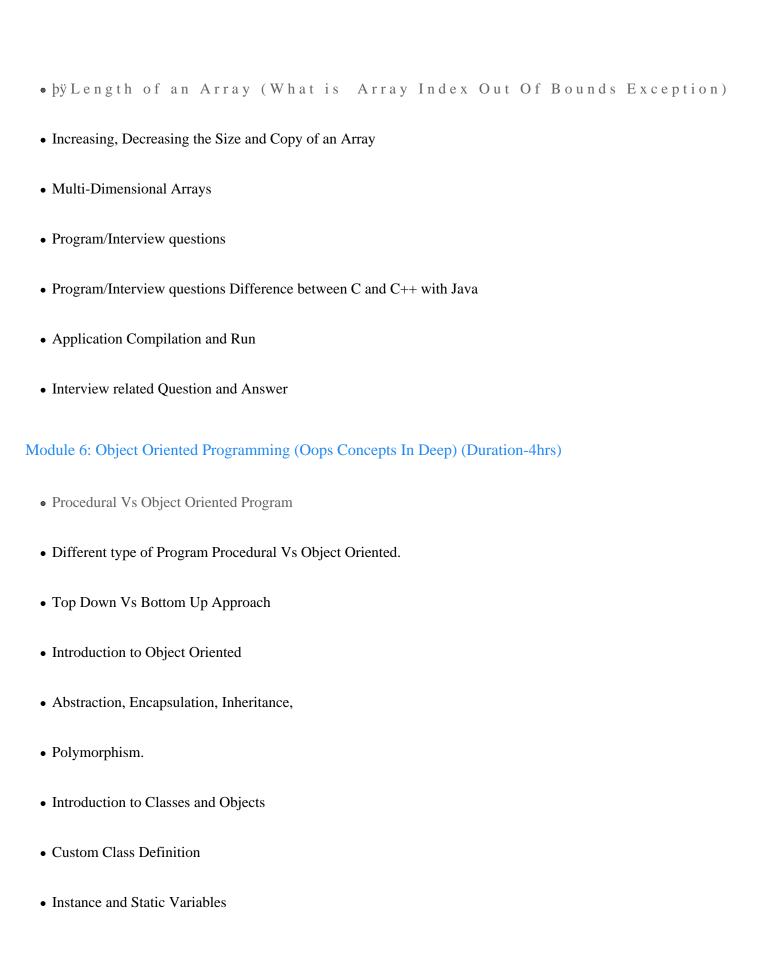

• Text Editors

• Consoles

# Module 4: Control Structures (Duration-1hr)

• Elements, Default Value, for-each loop, varargs

Working with Control Structures
• Types of Control Structures
• þÿ Decision Control Structure (if, if-else, if else if, switch case)
• þÿ Repetition Control Structure (do while, while, for)
Program/Interview questions
Module 5: Input Fundamentals And Datatypes In Java (Duration-2hrs)
Java program inputs from Keyboard
Methods of Keyboard inputs
• Scanner, Buffered Reader
• Problem Solving
• Java Array
• What is Array
• Array Declaration in java vs C and C++.
• Instantiation of an Array
String vs character array. Accessing Array

- Different ways to create Object Instance
- bÿInstance Variable and it s role in a Class
- Constructors, types of Constructor,
- Constructor Rule, Constructor Overloading
- bÿ Static Variable and it s use.
- Methods and their behavior.
- Constructor vs Methods
- Constructors
- bÿ this Keyword
- Java Access Modifiers (and Specifiers)
- Programming Interview related Question and Answer
- Call by value, Call by reference

# Module 7: Command-Line Arguments (Duration-1hr)

- What is a Command-Line Argument?
- Java Application with Command-Line Arguments
- Conversion of Command-Line Arguments
- Passing Command-Line Arguments

• Using methods (Static, Non Static)

# Module 8: Integrated Development Environment (Duration-0.5hr)

- Using various Editors
- Program Compilation, Execution in Editor
- Using Eclipse IDE
- Project Set Up
- Source File Generation
- Application Compilation and Run

# Module 9: Inner Class (Duration-1hr)

- First View of Inner Class
- Outer Class Access
- Types of Inner Class

### Module 10: Inheritance (Duration-2hrs)

- Complete concepts of Inheritance
- Sub-Classes
- Object Classes
- Constructor Calling Chain

- bÿ The use of super Keyword
- bÿ The use of private keyword inheritance.
- Reference Casting

### Module 11: Abstract Classes and Inheritance (Duration-2hrs)

- Introduction to Abstract Methods
- Abstract Classes and Interface
- Interface as a Type
- Interface v/s Abstract Class
- Interface Definition
- Interface Implementation
- bÿ Multiple Interfaces Implementation
- bÿ Interfaces Inheritance
- How to create object of Interface

### Module 12: Polymorphism (Duration-1hr)

- Introduction to Polymorphism
- Types of Polymorphism
- Overloading Methods

• Overriding Methods	
Hiding Methods	
• Final Class and Method	
Polymorphic Behavior in Java	
• Benefits of Polymorphism	
• þÿ Is-A vs Has-A	
Association Vs Aggregation	
• Interview related Question and Answer.	
Module 13: Package (Duration-2hrs)	
• Package and Class path and its use	
• First look into Packages	
• Benefits of Packages	
Package Creation and Use	
• First look into Class path	
• Class path Setting	
• Class Import	

• Package Import

• Role of public, protected, default and private w.r.t package
Namespace Management
• Package vs. Header File
• Creating and Using the Sub Package
• Sources and Class Files Management
Module 14: Using Predefined Package & Other Classes (Duration-2hrs)
• Java.lang Hierarchy
• Object class and using toString(), equals(),hashCode(), clone(), finalize() etc
• Using Runtime Class, Process Class to play music, video from Java Program
• Primitives and Wrapper Class
• Math Class
• String, StringBuffer, StringBuilder Class
• String Constant Pool
• Various usage and methods of String, StringBuffer, StringBuilder
• Wrapper Classes
• System Class using gc(), exit(), etc.

# Module 15: New Concepts In Package (Duration-1hr)

• Enum and its use in Java
• Working with jar
Module 16: Garbage Collection (Duration-0.5hr)
Garbage Collection Introduction
Advantages of Garbage Collection
Garbage Collection Procedure
• Java API
Interview related Question and Answer
Module 17: Exception Handling (Duration-2hrs)
• Introduction to Exceptions
• Effects of Exceptions
Exception Handling Mechanism
• Try, catch, finally blocks
• Rules of Exception Handling

• Auto boxing and Auto unboxing

• Static import.

• Instance of operator.

• Unchecked Exception
• Throw & throws keyword
• Custom Exception Class
Chained Exception.
• Resource handling & multiple exception class
• Interview related Question and Answer.
Module 18: Multithreading (Duration-3hrs)
• Introduction
• Advantages
• Creating a Thread by inheriting from Thread class
• Run() and start() method.
• Constructor of Thread Class
• Various Method of Thread Class
• Runnable Interface Implementation
• Thread Group
Thread States and Priorities

• Exception class Hierarchy, Checked &

Life Cycle of Thread
• Deprecated methods : stop(), suspend(),resume(), etc
• Interview related Question and Answer
Module 19: Input and Output Streams (Duration-3hrs)
• Java I/O Stream
• þÿ I/O Stream Introduction
• Types of Streams
Stream Class Hierarchy
• Using File Class
• Copy and Paste the content of a file
Byte Streams vs Character Streams
• Text File vs Binary File
Character Reading from Keyboard by Input Stream Reader

• Synchronization method, block

• Class & Object Level Lock

• Deadlock & its Prevention

• Inter thread Synchronization

• Interview related Question and Answer
Module 20: Serialization (Duration-0.5hr)
• Introduction to Serialization
• Using Object Streams to read/write object
• Transient Keyword
• Serialization Process
• Deserialization Process
• Interview related Question and Answer
Module 21: Collection Framework (Duration-3hrs)
• Generics(Templates)
• What is generic
Creating User defined Generic classes
• The java.util package

• Reading a Line/String from Keyboard by Buffered Reader

• Standard I/O Streams Using Data Streams to read/write

• PrintStream vs PrintWriter Using StreamTokenizer and RandomAccessFile

• primitive data

Using Collections class for sorting
Using Hashtable, Hash Map, Tree Map,
SortedMap, LinkedHashMap etc.
Iterator, Enumerator.
Using Queue, Deque, SortedQue, etc.
Using HashSet, TreeSet, LinkedHashSet etc
Using Random class
Using Properties in a Java Program
Using user defined class for DataStructure
Using Date and Formatting Date class.
Interview related Question and Answer

• Collection

• What is Collection Framework

• Using Vector, Array List, Stack,

Module 22: Java 8/9/10 Features (Duration-1hr)

• List, Set & Map interfaces

• Linked List, etc.

### Advanced Java Syllabus (Total Duration-30hrs)

# Module 1: JDBC (Duration-3hrs)

- Introduction to JDBC
- Databases and Drivers
- Types of Driver
- Loading a driver class file
- Establishing the Connection to different
- Database with different Driver
- Executing SQL queries by ResultSet,Statements , PreparedStatment interface.
- Using CallableStatement
- Transaction Management & BatchUpdate
- Programs/Interview related Question and Answer

# Module 2: JSP (Duration-5hrs)

### Basics Of Jsp

- Life cycle of JSP
- JSP API
- bÿJSP in Eclipse and other IDE s

Programs/Interview related Question and Answer.
Scripting Elements
• scriptlet tag
• expression tag
• declaration tag
• Programs/Interview related Question and Answer.
Implicit Objects
• out
• request
• response
• config
• application
• session
• pageContext
• page
• exception

• Programs/Interview related Question and Answer.
Directive Elements
• page directive

- include directive
- taglib directive
- Programs/Interview related Question and Answer.

# **Exception Handling**

### **Action Elements**

- jsp:forward
- jsp:include
- Bean class
- jsp:useBean
- jsp:setProperty & jsp:getProperty
- Displaying applet in JSP

# **Expression Language**

• What is expression and how to use it

- Define expression and use over the service flow
- The way to be achieve same in JSP

# Mvc In Jsp

- MVC pattern
- Working flow implementation of MVC
- CRUD operation using MVC
- Design a real time web application using MVC

#### **JSTL**

- Discussion on the tag library
- How to implement and use

# **Custom Tags**

- Custom Tag : What and Why?
- Custom Tag API?
- Custom Tag Example
- Attributes
- Iteration

### • Custom URI

# Module 3: Servlet ( Duration-7hrs)

• Basics of Servlet
• Servlet: What and Why?
• Basics of Web
• Servlet API
• Servlet Interface
• GenericServlet
• HttpServlet
• Servlet Life Cycle
• Working with Apache Tomcat Server
• Steps to create a servlet in Tomcat
• How servlet works?
• servlet in Myeclipse
• servlet in Eclipse
• servlet in Netheans

- Servlet Request methods
- Registration example with DB

### **Servlet Collaboration**

- Request Dispatcher
- send Redirect

# Servlet Configure

- Servlet Configure methods
- Servlet Configure example

#### Servlet Context

- Servlet Context methods
- Servlet Context example

# **Session Tracking**

- Cookies
- Hidden Form Field
- URL Rewriting
- HttpSession

### Module 4: Concurrent and implementation of collection (Duration-2hrs)

- Implemenation of ArrayList
- Implemenation of LinkedList
- Implemenation of HashMap
- Implementation of Queue/PriorityQueue/Deque

# Module 5: Advanced Multi-Threading (Duration-3hrs)

- Implemenation of Executor pool service and working mechanism with real time
- Big file(Single, multiple) processing using multiple thread
- Implemenation to achieve thread class and runnable interface

#### Module 6: Javamail Api (Duration-2hrs)

- Sending Email
- Sending email through Gmail server
- Receiving Email
- Sending HTML content

### Module 7: Design Pattern (Duration-2hrs)

- Singleton
- DAO

• Abstract • etc Module 8: Junit (Duration-1hr) • JUnit: What and Why? • Annotations used in JUnit • Assert class • Test Cases Module 9: Maven (Duration-1hr) • Maven: What and Why? • Ant Vs Maven • How to install Maven? • Maven Repository • Understanding pom.xml

• DTO

• MVC

• Front Controller

• Factory Method

- Maven Example
- Maven Web App Example
- Maven using Eclipse

Module 10: Project Guidance (Duration-4hrs)
